

SARFARAZ SHAIK

Software Engineer, Hyderabad, India
sarfarazshaik2807@gmail.com | +91-9397949059

PROFILE SUMMARY:

Experienced React Engineer with 3+ years of expertise in modern web technologies. Skilled in crafting resilient, responsive, and accessible user interfaces using **JavaScript (ES6+), HTML5, CSS3, TypeScript, React, NextJs, React Router, Redux, Context API, Figma and Hooks.**

Proficient in MS SQL Server and SQL Server Management Studio (SSMS), with the ability to develop, implement, and optimize stored procedures and functions using T-SQL, Triggers, Jobs, Replication, and user-defined tables. Skilled in using Jenkins for automating deployment processes and continuous integration/continuous delivery (CI/CD) pipelines.

Dedicated to advancing React development education, I foster collaborative, inclusive teams that prioritize pair programming and constructive code reviews. Committed to product excellence, I thrive on collaborating with product managers, designers, and back-end developers throughout the React Software Development Life Cycle (SDLC).

My development methodology emphasizes automated testing, thorough documentation, and maintainable code. Proficient in Git, SVN, Webpack, Vite, Visual Studio Code, and Agile/Scrum methodologies, I am poised to contribute effectively as a team player in dynamic and innovative tech environments.

KEY SKILLS:

Front-End Development Mastery: Expertly architected and developed significant front-end projects using React, showcasing proficiency in modern JavaScript and React's component-based architecture.

User-Centric Testing Excellence: Utilized user feedback to craft comprehensive end-to-end test suites, employing JavaScript expertise and React testing tools for testing, thus enhancing application reliability.

Effective Error Management: Implemented an advanced error-tracking system, leading to a substantial reduction in production bugs and highlighting adept problem-solving skills within the React ecosystem.

Boosting Developer Productivity: Tripled developer productivity through the development of a React-compatible design system and the adoption of a utility-first CSS architecture, showcasing proficiency in CSS3, HTML5, and scalable front-end practices.

Comprehensive React Ecosystem Proficiency: Demonstrated deep understanding and practical application of React features including Hooks, Context API, and Redux for efficient state management, thereby contributing to dynamic user interfaces.

TECHNICAL SKILLS:

Languages: Proficient in JavaScript (ES6+), HTML5, CSS3, TypeScript - crucial for robust React-based front-end architectures.

Frameworks/Libraries: Skilled in React, React Router, Bootstrap, Tailwind CSS, Material-UI - crafting responsive, Figma designs and dynamic user interfaces.

Tools: Experienced with Git, Webpack, Babel, ESLint, Visual Studio Code, NPM - tailored for efficient React project execution and maintenance.

API Integration: Adept in integrating and managing RESTful APIs and JSON for seamless data exchange and enhanced application functionality in React projects.

Version Control: Experienced in Git, GitHub, and Bitbucket - facilitating collaborative and error-free coding practices in React projects.

Agile/Scrum Methodologies: Practiced in Agile and Scrum methodologies, fostering a team-oriented, flexible, and effective approach to React development project management.

Database Skills: Proficient in MS SQL Server database as a developer. Develop, implement and optimize stored procedures and functions using T-SQL. Review and interpret ongoing business report requirements. Analyze existing SQL queries for performance improvements.

EXPERIENCE:

Foxtire Technologies, Hyderabad, Telangana

Nov 2021 - Oct 2023

Role and Responsibilities:

- **Web Development:** Developed and maintained web applications using JavaScript libraries, HTML, CSS, and JSON, creating functional and visually appealing user interfaces. Ensured cross-browser compatibility and responsive design implementation, crafting layouts adaptable to various screen sizes and devices. Collaborated closely with backend teams to integrate front-end and back-end technologies seamlessly.
- **Frontend Development with React:** Gained hands-on experience in building dynamic, responsive user interfaces using React and Redux. Maintained clean, reusable code to ensure application scalability and conducted regular code reviews to uphold quality standards. Contributed to creating modern, user-centric web applications that met business requirements.
- **SQL Development:** Worked extensively with SSMS to design and optimize Stored Procedures, Functions, Views, Triggers, and complex T-SQL Queries. Gained expertise in Transact-SQL (DDL, DML, DCL) and in the design and normalization of database tables. Implemented business logic using Triggers, Indexes, Views, and Stored Procedures, enhancing application performance and maintainability.
- **RDLC Reports:** Designed RDLC Reports and Bartender Labels using Microsoft Visual Studio Tool and Bartender Design Tool, including Matrix, Table, Lists, Grouping, and Sub Reports.
- **Jenkins and Process Automation:** Created Task Schedulers for Jenkins Slave Launch to streamline syncing and deployment processes. Developed scheduled processes using .NET Console Applications, automating critical backend operations.
- **Application Development:** Used Microsoft Visual Studio to develop Windows Form Applications, Console Applications, and Web Applications, demonstrating versatility in application development.

Trangla Innovations, Hyderabad, Telangana

Nov 2023 - Apr 2024

Role and Responsibilities:

- **Frontend Development:** Specializing in ReactJS, leading the creation of dynamic and responsive user interfaces.
- **Web Technologies Expertise:** Utilizing JavaScript libraries, HTML, CSS, and JSON to enhance web application functionality and user experience.
- **Collaborative Development:** Working closely with backend teams to ensure seamless integration of front-end and back-end technologies.

- **Responsive Design Implementation:** Crafting web layouts that are adaptable to various devices and screen sizes, ensuring a seamless user experience.
- **Cross-Browser Compatibility:** Ensuring that web applications function consistently across different browsers.
- **Code Maintenance:** Writing clean, maintainable code and conducting regular code reviews to uphold high-quality standards.

Technical Problem-Solving: Identifying and resolving technical issues, enhancing the overall functionality of the applications.

Netweb Software, Hyderabad, Telangana

May 2024 - Jan 2025

Role and Responsibilities:

- **Web Application Development:** Built and enhanced healthcare applications using React.js, NextJs, Redux Toolkit, and TypeScript with a focus on scalability and user experience.
- **Provider Onboarding and Facility Setup:** Designed intuitive UI components for modules like Provider Onboarding, Facility Setup, and Reports, integrating Google Maps for location-based services.
- **Performance Optimization:** Improved performance by implementing AWS CloudFront for image caching, reducing application load times.
- **API Integration:** Integrated REST APIs for provider onboarding, bed status updates, facility details, and reporting using Axios to ensure seamless data synchronization.
- **User Interface Design:** Designed and developed intuitive user interfaces with smart search, filters, and robust validation flows, enabling seamless navigation and data management. Along with the role-based access controls.
- **Collaboration and Issue Resolution:** Collaborated with QA teams to resolve UI responsiveness and validation issues, ensuring a polished user experience.
- **Technical Problem-Solving:** Contributed to crafting modern, responsive web applications that meet healthcare business requirements, emphasizing code quality, scalability, and maintainability.

PROJECTS:

Project 1: Cloud inventory management system (CIMS)

Client: Foxfire Technologies

Development Company: Foxfire Technologies

Role: Software Engineer

Project Description:

My role revolves around designing user-friendly interfaces and integrating RF devices for efficient warehouse operations within the Cloud Inventory Management System (CIMS). I ensure smooth data transactions between the host system and CIMS, enabling real-time updates on inventory status and order processing. Emphasizing responsive design and performance optimization, I strive to create a reliable interface that boosts productivity and reduces errors. Furthermore, I offer documentation and training to support warehouse staff in effectively utilizing the system.

Project 2: Truck Management System

Client: Trangla Innovations

Development Company: Trangla Innovations

Role: Frontend Developer

Project Description:

Engineered the Fleet Management System for SwiftLogistics, an end-to-end solution for optimizing trucking operations. This system streamlines fleet management tasks, including truck and driver profiles, load assignments, and route optimization. Real-time tracking and communication tools ensure efficient coordination between dispatchers and drivers, enhancing overall logistics efficiency and customer satisfaction.

Project 3: Locate care

Client: Salvone Technology Solutions

Development Company: Netweb Software

Role: React Developer

Project Description:

Developed and designed user interfaces for a healthcare management platform catering to providers and NHS/ICB users. Designed and implemented modules such as Provider Onboarding, Facility Setup, Bed Management, and Reports, focusing on modern, intuitive, and responsive UI using React.js, Redux Toolkit, and TypeScript.

- **UI Design:** Created visually appealing and user-centric interfaces with smart search, filters, and validation flows, Figma designs, ensuring a seamless and engaging user experience.
- **Google Maps Integration:** Enhanced location-based services by embedding maps and interactive elements for user navigation.

- **Performance Optimization:** Integrated AWS CloudFront for image caching, reducing load times and improving UI responsiveness.
- **Reporting Modules:** Developed dynamic, visually clear reporting tools, including features like export functionality, dynamic filters, and role-based access controls.
- **Collaboration:** Worked closely with the UX/UI team to ensure alignment with design standards and user needs, contributing to the platform's usability and accessibility.

EDUCATION HISTORY

- Bachelor of Computer Science Engineering from Lovely Professional University in Year-2020
- MPC from Board of Intermediate Education in Year-2014
- SSC from Board of Secondary Education in Year-2012
